bookingbooster

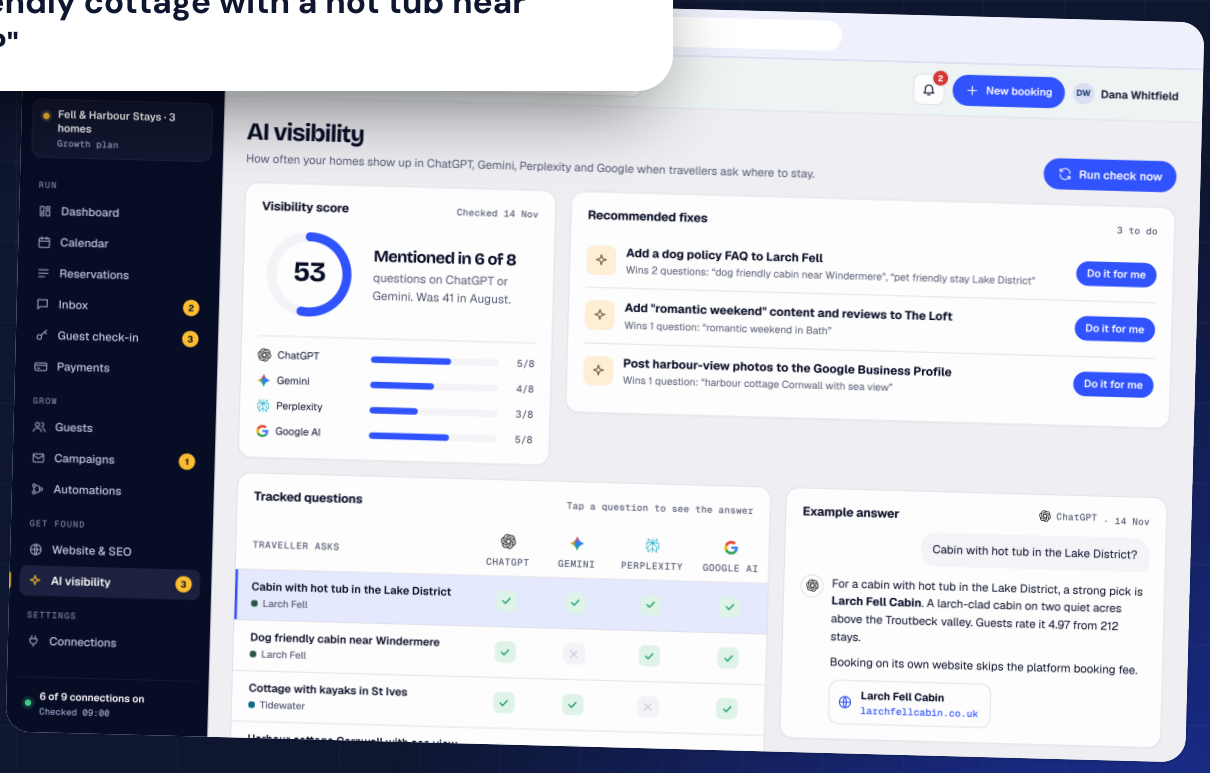

FREE GUIDE · SEO + AEO FOR HOSTS

Get Recommended by AI

How holiday let and short let hosts show up in ChatGPT, Google and AI search. Local pages, structured data, reviews, FAQs and a 90-day plan.

A TRAVELLER ASKS

"Dog-friendly cottage with a hot tub near Keswick?"

Will your home be the answer?
THIS GUIDE SHOWS YOU HOW

9 CHAPTERS · AI VISIBILITY AUDIT · FAQ BANK · JSON-LD SAMPLES

BOOKINGBOOSTER.CO.UK

INSIDE THIS GUIDE

Contents

SEO gets you onto Google's results page. AEO, answer engine optimisation, gets you named in the answer itself. You need both, and luckily they reward the same work.

00 **Search has changed** 03
What AEO means for a holiday let

01 **How AI picks what to recommend** 04
And how to check what it says about your area

02 **Your site is the source of truth** 07
Titles, facts and the basics that everything else rests on

03 **Local pages that win** 08
Page types, structure and a worked outline

04 **Answer-ready content and FAQs** 10
Write so machines can quote you, plus a 30-question FAQ bank

05 **Structured data** 12
JSON-LD for your home and FAQs, and how to test it

06 **Reviews everywhere** 14
Where they live, how to ask, how to reply

07 **Listings and consistency** 15
Maps, directories and tourism sites

08 **Technical checklist** 16
Speed, photos, indexing and Search Console

09 **The 90-day plan and how to measure it** 17
Month by month, plus a scorecard

\+ **Example host and how Bookingbooster does this for you** 19
An illustrative audit, then the tool built for it

A NOTE ON HONESTY

Nobody can guarantee a place in an AI answer or a Google ranking, and anyone who promises one is guessing. This guide gives you the work that makes you the most useful, best-documented answer for your area. Examples are illustrative and labelled.

00 INTRODUCTION

Search has changed. The fundamentals have not.

A guest planning a weekend in the Lake District used to type "cottage Keswick" and scroll. Now many type a whole sentence into ChatGPT, Gemini, Perplexity or Google, and read a written answer that names a handful of places.

ChatGPT Gemini Perplexity Google

SEO

Search engine optimisation. Making your pages easy for Google and Bing to find, understand and rank in the list of results.

AEO

Answer engine optimisation. Making your home easy for AI assistants to understand, trust and **name** when someone asks a question your home answers.

Why hosts should care

Platform search results are crowded with near-identical listings. An answer that names your home and links to your own site sends a guest who is ready to book, and books direct.

THE OLD QUERY

cottage keswick

THE NEW QUERY

"We're two adults and a spaniel looking for a cottage near Keswick with a hot tub and a pub we can walk to. Any ideas for late October?"

The second question has six facts in it: area, group, dog, hot tub, walkable pub, dates. A home whose site states all six clearly is far easier to recommend.

THE BIG IDEA

AI assistants recommend what they can **verify**. Be specific, be consistent everywhere, and publish the facts guests ask about on pages you own.

ChatGPT, Gemini, Perplexity, Google, Claude and Copilot are trademarks of their owners. bookingbooster is not affiliated with or endorsed by them.

Where the answers come from

Each assistant works differently and changes often, but most answers about places to stay draw on a mix of the same kinds of source. You can influence every one of them.

SOURCE
Your website
Home pages, local guides, FAQs, structured data

SOURCE
Listings and maps
Business listings, maps and directories

SOURCE
Reviews
What guests say, and where they say it

SOURCE
Other sites
Local blogs, tourism sites, press, forums

›

OUTPUT
The answer
A short list of named places, often with links

What tends to help a home get named

Relevance
The page clearly matches the question: the right area, the right features, the right kind of trip. Vague pages match nothing.

Clarity
Facts stated plainly in text, not hidden in photos: sleeps 4, dogs welcome, 8 minutes' walk to the pub, hot tub, EV charger.

Corroboration
The same facts appear on your site, your listings and in reviews. Agreement across sources builds confidence.

Reputation
Recent, genuine reviews that mention the things people ask about, plus mentions on other trusted local sites.

BE CAREFUL WITH MYTHS

There is no secret file or paid tag that makes AI recommend you. Some assistants search the web live, some lean on what they learned earlier, and most do a bit of both. The reliable strategy is to be the clearest, best-corroborated answer.

01 RUN YOUR OWN AI VISIBILITY CHECK

Find out what AI says about your area today

Do this before you change anything, so you have a baseline. Then repeat it monthly. It takes about 45 minutes the first time.

1. **Write 10 to 20 traveller questions.** Use the question bank on the next page. Mix broad questions ("cottages in the Cotswolds") with specific ones that fit your home ("Cotswolds cottage sleeps 8 with a pub in walking distance").
2. **Ask each assistant.** ChatGPT, Gemini, Perplexity, and Google (look at the AI Overview if one appears). Use a private browser window where you can so personal history has less effect.
3. **Log the result.** Was your home named? Which homes were? Which sources were linked or cited?
4. **Note the reasons.** When a competitor is named, look at the page it links to. What does it say that yours does not?
5. **Turn gaps into tasks.** Each missing fact or missing page becomes an item for chapter 03 or 04.

AI visibility log

TICK IF YOUR HOME IS NAMED

Your score: questions where you were named on at least one assistant ÷ questions asked. Write it down: _____ of _____

ChatGPT, Gemini, Perplexity, Google, Claude and Copilot are trademarks of their owners. bookingbooster is not affiliated with or endorsed by them.

01 WORKSHEET

The traveller question bank

Guests ask in patterns. Fill in each pattern for your home and area. Every question you write is also a page or FAQ you may need.

FEATURE + PLACE

"Cottage with a hot tub near `{town}`"
"`{area}` holiday let with an EV charger"

WHO'S COMING

"Dog-friendly cottage in `{area}`"
"Family holiday let near `{attraction}` sleeps 6"

OCCASION

"Romantic weekend in `{area}`"
"Big house for a 40th birthday in the `{area}`"

SEASON OR EVENT

"Where to stay in Edinburgh for the Festival"
"Cosy Christmas cottage in `{area}`"

WALKABLE TO

"Cotswolds cottage within walking distance of a pub"
"Flat near `{venue}` for a gig"

PRACTICAL NEEDS

"Step-free holiday let in `{town}`"
"Short let in `{city}` with parking and fast Wi-Fi"

TIP

Your best questions come from your own inbox. Read your last 50 guest enquiries and messages. The questions guests ask you are the questions they ask AI.

02 YOUR SITE IS THE SOURCE OF TRUTH

Put every fact on a page you own

Platform listings are useful, but you do not control how they are shown or indexed. Your own site is the one place where you decide exactly what is said, how it is structured, and which link a guest clicks to book.

Title tags and headings that match real questions

WEAK	STRONGER
Welcome to Bramble Cottage	**Bramble Cottage: dog-friendly cottage with hot tub, near Keswick**
Our Apartment	**Two-bed Edinburgh flat, 5 minutes' walk to the Royal Mile**
Gallery | Home | Book	**Cotswolds cottage sleeps 8, pub at the end of the lane**

Example property names are made up for illustration.

The fact block

Put a short, plain-text block of facts on every home page. AI tools and search engines read text far more reliably than they read photos or icons.

TEMPLATE · FACT BLOCK — PLAIN TEXT, NEAR THE TOP

`{name}` is a `{type}` in `{village}`, `{area}`. Sleeps `{n}` in `{n}` bedrooms. `{n}` dogs welcome. Private hot tub. Parking for `{n}` cars. EV charger. Wi-Fi about `{n}` Mbps.

`{n}` minutes' walk to `{pub}`. `{n}` minutes' drive to `{town}`. Nearest station: `{station}`.

- [ ] Same name, spelt the same way, everywhere
- [ ] Village, area and nearest town named in text
- [ ] Numbers as numbers: sleeps 4, 2 bedrooms, 1 bathroom
- [ ] Times and distances you have checked yourself
- [ ] Accessibility facts stated honestly, including stairs
- [ ] A clear "Book direct" link on every page

RULE OF THUMB

If guests have asked you something twice, it belongs on your site in plain text. If it matters to the booking decision, it belongs in the fact block.

03 LOCAL PAGES THAT WIN

One question, one page

Your home page answers "what is this place?" Local pages answer the questions people ask before they know you exist. Each one should be genuinely useful even to someone who never books with you.

AREA GUIDE

"Walks from the door in Borrowdale". Routes, distances, terrain, where to park, where to eat after.

NEAR A LANDMARK

"Where to stay near the Eden Project". Drive times, opening tips, rainy day back-ups.

TRIP TYPE

"A dog-friendly week in North Cornwall". Beaches with seasonal dog rules, cafés, vets, day plans.

SEASON OR EVENT

"Staying in Edinburgh for the Festival". When to book, getting around, quiet corners.

The structure that works

1. **A title that is the question.** "Dog-friendly beaches near Padstow: a local's guide".
2. **A two-sentence answer first.** Give the short answer before the detail, so it can be quoted.
3. **Specifics that only a local knows.** Which car park fills by 10am, which café has a dog bowl outside.
4. **Short sections with clear subheadings.** Each one a mini answer: "Best for families", "Year-round dog beaches".
5. **A natural link to your home.** "Our cottage is 6 minutes' drive from Harlyn Bay. See dates and book direct."
6. **A date and an author.** "Updated March 2026 by Ellie, who has hosted here since 2019." Freshness and real experience build trust.

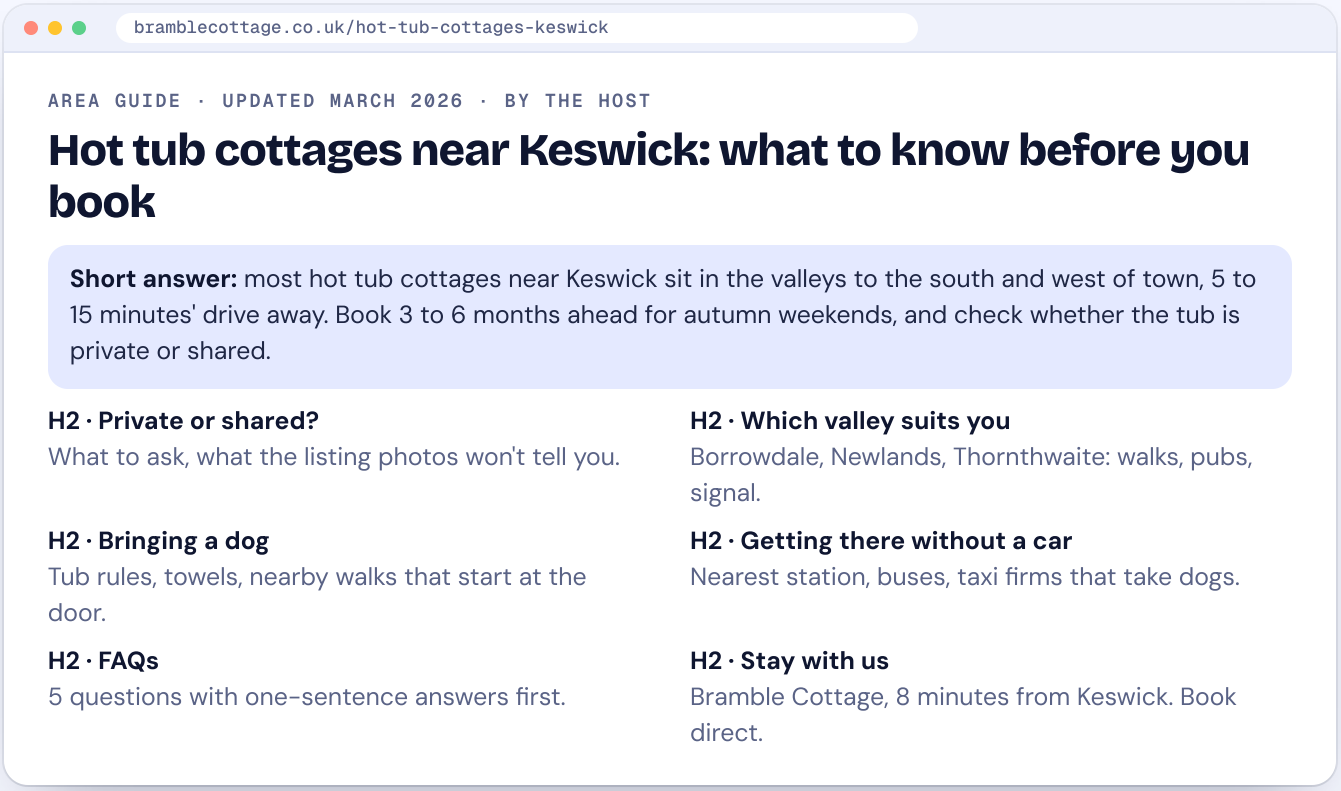

AVOID

Dozens of near-identical pages that swap one town name for another. They help nobody, and search engines treat that pattern as low quality. Write fewer, better pages.

03 WORKED OUTLINE

A local page, start to finish

An illustrative outline for a made-up cottage near Keswick. Copy the shape, not the words.

Illustrative example. Property and site are fictional.

800–1,500

Words is a sensible range for a guide like this. Length is not the goal; usefulness is.

1 a month

A pace most hosts can sustain. Twelve great pages beat fifty thin ones.

5+

Photos you took yourself, with descriptive alt text.

04 ANSWER-READY CONTENT

Write so you can be quoted

AI answers are built from short, self-contained statements. If your best facts are buried in a long, flowery paragraph, they are hard to lift. If they are stated plainly, they are easy.

Four rules

1. Answer first

Open each section with a one-sentence answer, then explain. "Yes, dogs are welcome: up to two, with no extra fee."

2. One idea per paragraph

Short paragraphs that each make one claim are easier to quote accurately.

3. Name things

Name the beach, pub, trail, station and village. "A great pub nearby" says nothing a machine can match.

4. Numbers over adjectives

"6 minutes' walk" beats "a short stroll". "Sleeps 4" beats "perfect for small groups".

Before and after

BEFORE

"Nestled in the heart of stunning countryside, our charming retreat offers the perfect escape for those seeking tranquillity, with plenty to explore on your doorstep and lovely local amenities."

AFTER

"Bramble Cottage is a two-bedroom stone cottage in Braithwaite, 8 minutes' drive from Keswick. It sleeps 4, welcomes up to 2 dogs and has a private hot tub. The Fox & Hounds is a 6-minute walk."

The "after" version contains seven facts an assistant can match to a question. The "before" contains none.

QUICK TEST

Read a paragraph aloud and ask: **could someone quote one sentence of this as a fact?** If not, rewrite it.

04 FAQ BANK

30 questions your site should answer

Tick the ones you already answer on your own site. Write the rest, each starting with a one-sentence answer.

Arriving

- [ ] What time is check-in and checkout?
- [ ] How do we get the keys?
- [ ] Is there parking, and how many cars?
- [ ] Is there an EV charger nearby?
- [ ] What is the nearest station?

The home

- [ ] How many does it sleep, and in what beds?
- [ ] Are there stairs or steps?
- [ ] How fast is the Wi-Fi?
- [ ] Is the hot tub private?
- [ ] Is there a washing machine?

Who's coming

- [ ] Are dogs allowed, how many, any fee?
- [ ] Do you have a cot and highchair?
- [ ] Is it suitable for older guests?
- [ ] Can we host a small celebration?
- [ ] Is it good for remote working?

The area

- [ ] How far is the nearest pub, shop, beach?
- [ ] Which walks start from the door?
- [ ] What is there to do when it rains?
- [ ] Is phone signal reliable?
- [ ] Where is the nearest supermarket?

Booking

- [ ] Why book direct rather than on a platform?
- [ ] What is your cancellation policy?
- [ ] Is there a security deposit?
- [ ] Is there a minimum stay?
- [ ] Do you offer short breaks?

During the stay

- [ ] How do we contact you?
- [ ] What is provided: towels, linen, logs?
- [ ] Is there a welcome pack?
- [ ] What are the house rules?
- [ ] Can we check out late?

TEMPLATE · ANSWER-FIRST FAQ — QUESTION, SHORT ANSWER, DETAIL

Can we bring our dog? Yes. Up to `{n}` well-behaved dogs are welcome at no extra charge. There is an enclosed garden, a boot room with a dog shower, and the `{walk}` starts at the gate. Please keep dogs off beds and sofas.

05 STRUCTURED DATA

Label your facts for machines

Structured data is a small block of code, usually JSON-LD, that describes your page in a standard vocabulary from schema.org. Guests never see it. Search engines and other tools can read it to understand exactly what your page is about.

Useful types for a holiday let site

- **VacationRental** or **LodgingBusiness**: the home, its address area, rooms and amenities
- **Accommodation** details: bedrooms, occupancy, floor size
- **FAQPage**: your question and answer sections
- **Article**: your local guides, with author and date
- **Organization**: your hosting business, logo and contact

KNOW THE LIMITS

Markup does not guarantee rich results or AI mentions. Google ties some vacation rental features to its own partner programmes, shows FAQ rich results for only a few kinds of site, and may not show review stars for reviews a business publishes about itself. Mark up honestly anyway: clear, matching data still helps machines read you.

```
<!-- In the <head> of the home's page -->
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "VacationRental",
  "name": "Bramble Cottage",
  "url": "https://bramblecottage.co.uk/",
  "description": "Two-bedroom stone cottage
in
    Braithwaite, near Keswick. Sleeps 4,
    dogs welcome, private hot tub.",
  "image":
["https://bramblecottage.co.uk/img/front.jp
g"],
  "address": {
    "@type": "PostalAddress",
    "addressLocality": "Braithwaite",
    "addressRegion": "Cumbria",
    "addressCountry": "GB"
  },
  "containsPlace": {
    "@type": "Accommodation",
    "numberOfBedrooms": 2,
    "occupancy": { "@type":
"QuantitativeValue",
                   "maxValue": 4 },
    "petsAllowed": true,
    "amenityFeature": [
      { "@type":
"LocationFeatureSpecification",
        "name": "Hot tub", "value": true },
      { "@type":
"LocationFeatureSpecification",
        "name": "EV charger", "value": true
}
    ]
  }
}
</script>
```

Illustrative example for a fictional property. Check property names against current schema.org and Google documentation before you publish.

05 FAQ MARKUP AND TESTING

Mark up your FAQs, then test everything

```
<!-- On a page that shows these Q&As -->
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "FAQPage",
  "mainEntity": [
    {
      "@type": "Question",
      "name": "Can we bring our dog?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "Yes. Up to 2 dogs are welcome
          at no extra charge."
      }
    },
    {
      "@type": "Question",
      "name": "How far is the nearest pub?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "The Fox & Hounds is a 6-minute
          walk from the front door."
      }
    }
  ]
}
</script>
```

Rules that keep you safe

- [ ] Only mark up content that is visible on the same page
- [ ] Make the markup match the page word for word where you can
- [ ] Never mark up reviews, ratings or awards you cannot back up
- [ ] Update markup when facts change: beds, pets, prices
- [ ] One clear FAQ section per page, not the same block on every page

How to test

1. **Schema Markup Validator** (validator.schema.org) checks the code is valid schema.org.
2. **Google Rich Results Test** shows what Google can read and flags errors.
3. **Search Console** reports problems across your whole site over time.

NO DEVELOPER?

Most website builders let you paste JSON-LD into a page's head or a custom code block. If yours does not, a site built for holiday lets should add it for you automatically.

06 REVIEWS EVERYWHERE

Reviews are the evidence AI looks for

Reviews do two jobs. They persuade guests, and they corroborate your facts. A review that says "the hot tub was spotless and the pub is a five-minute walk" supports two claims on your site at once.

ON PLATFORMS

Your Airbnb and Booking.com reviews. You can quote them on your site, with the date and where they were left. Check each platform's rules on reuse.

ON YOUR OWN SITE

Ask direct guests to review on your site after checkout. Show them all, not just the five-star ones.

ON PUBLIC LISTINGS

Map listings, local tourism sites and directories where you are eligible. Reviews there are visible to search and AI tools.

TEMPLATE · REVIEW REQUEST — DAY AFTER CHECKOUT

Hi `{first_name}`, thanks for staying at `{home}`. If you have two minutes, a short review helps future guests know what to expect. It would be great to hear what you thought of `{feature}` and the area. `{review_link}`

TEMPLATE · REPLY TO A REVIEW — SPECIFIC, WARM, FACTUAL

Thank you `{first_name}`. So glad `{dog_name}` loved the walk up to `{place}` from the gate. You're right about the hill to the pub: it's 6 minutes down and a bit longer back up. Hope to see you again.

THE RULES

Never write, buy or swap reviews, and do not offer discounts or gifts in return for positive ones. UK consumer law bans fake reviews and concealed incentivised reviews, and platforms remove them. Asking every guest for an honest review is fine.

Review audit

FILL IN ONCE A QUARTER

WHERE	REVIEWS	AVERAGE	MOST RECENT	MENTIONS YOU WANT MORE OF
Airbnb	____	____	________	_____
Booking.com	____	____	________	_____
Your own site	____	____	________	_____
Public listings	____	____	________	_____

07 LISTINGS AND CONSISTENCY

Same facts, every place you appear

When your site, your listings and other sites agree, machines grow more confident about who you are. When they disagree, you look like three different businesses.

WHERE	WHAT TO DO
Google Business Profile	Check Google's current eligibility rules first. Individual rental homes are often not eligible on their own, while a hosting business that serves customers may be. If you are eligible, complete every field and add your own photos.
Bing Places and Apple Business Connect	The same idea for Bing and Apple Maps. Some assistants draw on these sources, so keep them consistent.
Local tourism and destination sites	Many areas have an official visitor site or accommodation directory. A listing there is a strong local signal.
Niche directories	Dog-friendly, accessible, eco or walking holiday directories, where relevant to your home.
Local partners	Wedding venues, outdoor centres and event organisers that list nearby places to stay.

Consistency check

DO THIS ONCE A QUARTER

FACT	YOUR SITE	AIRBNB	BOOKING.COM	OTHER LISTING
Property name	☐	☐	☐	☐
Village and area	☐	☐	☐	☐
Sleeps and bedrooms	☐	☐	☐	☐
Pets policy	☐	☐	☐	☐
Key features (hot tub, parking, EV)	☐	☐	☐	☐
Link to your own site, where allowed	☐	n/a	n/a	☐

08 TECHNICAL CHECKLIST

The plumbing that has to work

None of this is glamorous. All of it matters. If search engines cannot crawl your site quickly, nothing in the previous chapters can help.

Found and indexed

- [ ] Site on your own domain, served over HTTPS
- [ ] Verified in Google Search Console and Bing Webmaster Tools
- [ ] XML sitemap submitted, and updated when you add pages
- [ ] No important pages blocked by robots.txt or "noindex"
- [ ] Every page has a unique title and meta description
- [ ] One clear H1 per page that says what it is

Fast and usable

- [ ] Loads quickly on a phone with average signal
- [ ] Photos compressed and sized for the screen
- [ ] Text is real text, not words inside images
- [ ] Booking works without pop-ups blocking the page
- [ ] Buttons big enough to tap; nothing sideways-scrolls
- [ ] Core Web Vitals checked in Search Console

Photos that work for search

- [ ] Descriptive file names: `hot-tub-bramble-cottage.jpg`
- [ ] Alt text that describes the photo plainly
- [ ] Your own photos, not stock
- [ ] Captions where a fact matters ("View from the main bedroom")

Links

- [ ] Local pages link to the home they mention
- [ ] Home pages link to the relevant local guides
- [ ] No broken links (check quarterly)
- [ ] Mentions from local partners link to your site

ABOUT AI CRAWLERS

Some AI companies run their own crawlers, which you can allow or block in robots.txt. If you want to be recommended, make sure you are not blocking them by accident. Check your settings, or ask your website provider.

09 THE 90-DAY PLAN

Three months to become the obvious answer

Month 1 — FOUNDATIONS

- [ ] Run the AI visibility check and save the baseline
- [ ] Fix titles and headings on every home page
- [ ] Add a fact block to each home
- [ ] Write your first 15 FAQs, answer first
- [ ] Set up Search Console and submit a sitemap
- [ ] Run the consistency check

Month 2 — DEPTH

- [ ] Add structured data for homes and FAQs, and test it
- [ ] Publish your first local page
- [ ] Ask recent direct guests for reviews on your site
- [ ] Claim or update listings you are eligible for
- [ ] Compress and rename photos, add alt text
- [ ] Write 15 more FAQs

Month 3 — AUTHORITY

- [ ] Publish a second local page
- [ ] Ask two local partners to link to a guide
- [ ] Reply to every recent review, specifically
- [ ] Re-run the AI visibility check
- [ ] Compare with your baseline and pick next pages
- [ ] Fill in the scorecard on the next page

BE PATIENT

Search engines can take weeks to pick up changes, and AI assistants can take longer. Judge progress quarter by quarter, not day by day.

Your top 3 pages to write

1 ..... Month __

2 ..... Month __

3 ..... Month __

09 HOW TO MEASURE IT

Four numbers that show it is working

METRIC	WHERE TO FIND IT	WHAT GOOD LOOKS LIKE
AI mention score	Your monthly AI visibility check: questions where you are named ÷ questions asked	Rising quarter on quarter
Search impressions	Search Console, filtered to your local and feature queries	More queries, more specific ones
Clicks from search	Search Console clicks, plus visits from AI tools in your site analytics where they show as referrers	Steady growth, with local pages contributing
Direct bookings from search	Your booking system's source report	The number that pays for all of it

Quarterly scorecard

COPY THIS PAGE

QUARTER	AI SCORE	IMPRESSIONS	CLICKS	DIRECT BOOKINGS	PAGES ADDED
Baseline	__ of __	______	_____	____	________
Q__ 20__	__ of __	______	_____	____	________
Q__ 20__	__ of __	______	_____	____	________
Q__ 20__	__ of __	______	_____	____	________
Q__ 20__	__ of __	______	_____	____	________

KEEP IT COMPARABLE

Ask the same questions, in the same way, at the same point each month. Answers vary from one try to the next, so look at the trend across many questions rather than any single answer.

ILLUSTRATIVE EXAMPLE

Example host: Tom, one lodge near Windermere

Tom is not a real customer. He is a composite we use to show how an audit turns into a to-do list. Results shown are hypothetical.

THE BASELINE CHECK

Tom asks 12 questions across four assistants. His lodge is named for 2 of them, both broad ("lodges near Windermere"). For the specific ones he cares about, competitors are named instead.

"Lodge with hot tub near Windermere"	Named
"Dog-friendly lodge Lake District"	Not named
"Lake District lodge with EV charging"	Not named
"Accessible lodge near Bowness"	Not named

WHAT THE GAPS REVEAL

- His site never mentions dogs, though he welcomes them
- The EV charger appears only in a photo
- His step-free access is not described anywhere
- Booking.com says "sleeps 6", his site says "sleeps 4 to 6"
- The competitor named for "dog-friendly" has a local guide to dog walks around Windermere

Tom's 90-day list

1
Fact block with dogs, EV charger and step-free access in plain text

2
FAQs on pets and accessibility, answer first, with FAQ markup

3
Local guide: "Dog walks around Windermere, from easy to big days"

WHAT TOM CHECKS AT DAY 90

- [ ] Re-run the same 12 questions on the same four assistants
- [ ] Search Console: new impressions for "dog-friendly" and "EV charging" queries
- [ ] Booking.com and site now both say "sleeps 6"
- [ ] Direct enquiries that mention dogs or accessibility

THE LESSON

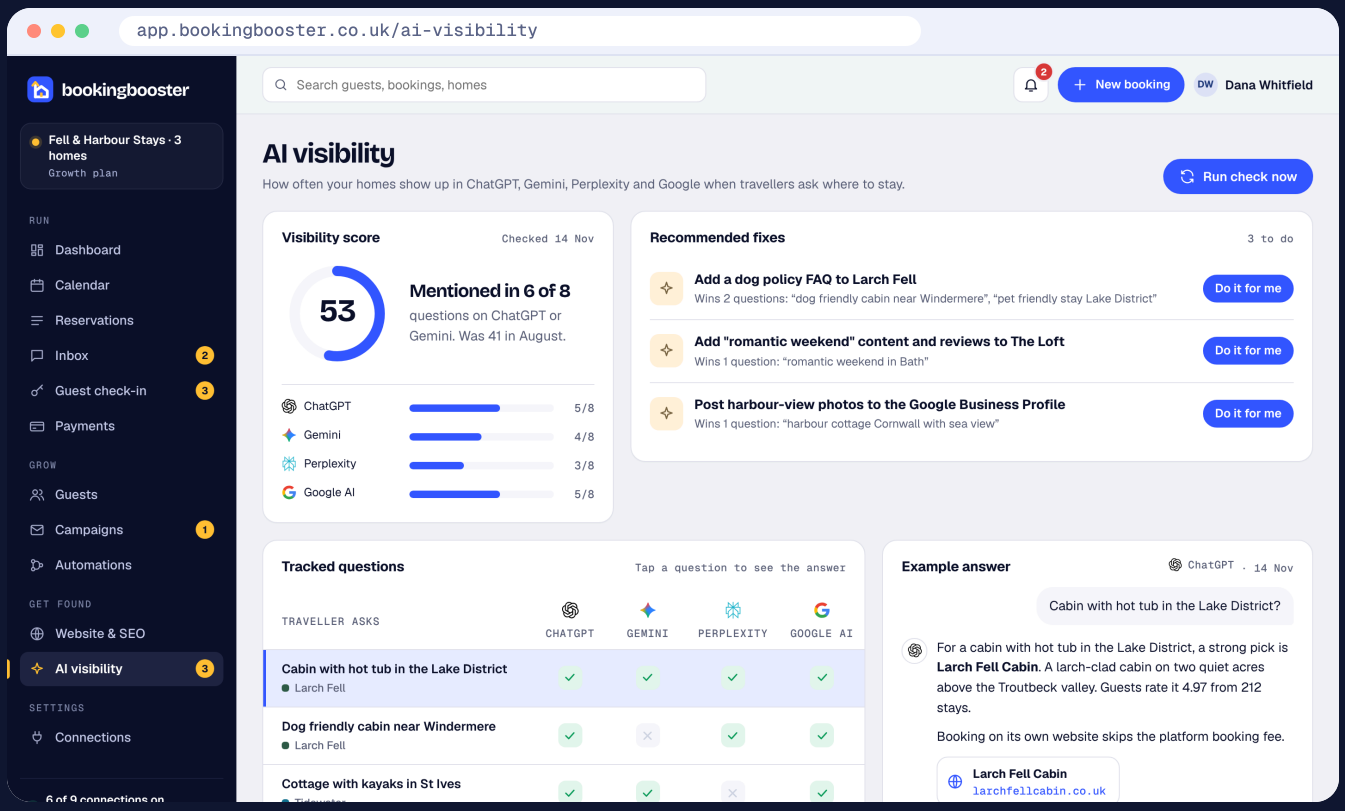

Tom did not need more content. He needed the facts he already had to be written down, consistently, on pages he owns.

HOW BOOKINGBOOSTER DOES THIS FOR YOU

AI visibility, tracked and fixed every month

On the Growth plan, Bookingbooster runs the check in chapter 01 for you, tracks which questions name your homes on ChatGPT, Gemini, Perplexity and Google, and turns the gaps into fixes.

ChatGPT Gemini Perplexity Google

Demo account. Visibility score, questions and answers are sample data from the Bookingbooster prototype.

TRACKED QUESTIONS

The traveller questions that matter for your homes, checked across four assistants.

RECOMMENDED FIXES

Specific tasks, like adding a pet policy FAQ, with a "Do it for me" button.

EXAMPLE ANSWERS

See exactly what an assistant said, and whether it linked to your own site.

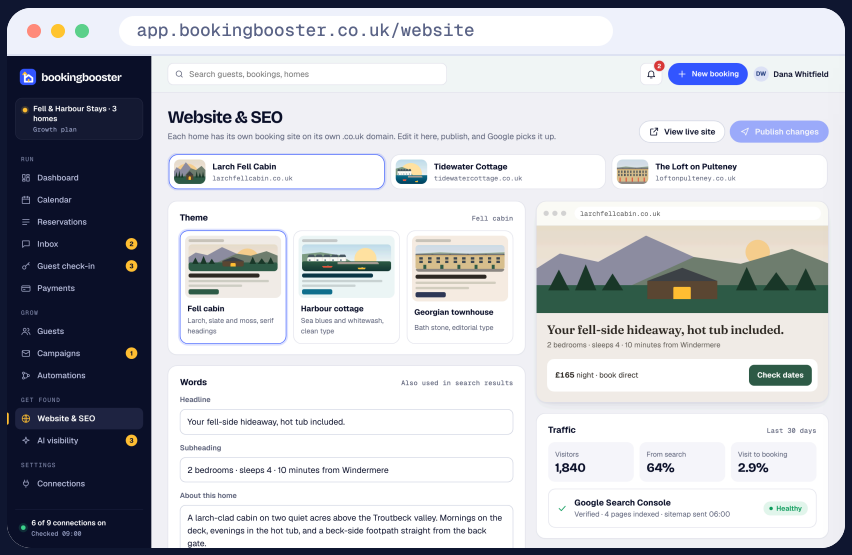

DONE FOR YOU ON GROWTH

Each month our team works through the fixes: new FAQs, fact blocks, local pages and listing updates. You approve, we publish, and the next check shows what moved.

ChatGPT, Gemini, Perplexity, Google, Claude and Copilot are trademarks of their owners. bookingbooster is not affiliated with or endorsed by them.

+ YOUR SITE, BUILT TO BE FOUND

Pages that search engines and AI can read

Website & SEO. Edit headline and words, see search traffic and Search Console status. Demo account.

- **Your own domain** with fast, mobile-first pages
- **Structured data** for homes and FAQs added automatically
- **New local SEO pages every month**, written for you on Growth
- **Search Console** connected, sitemap sent
- **Consistent facts** from one place, used across your site

Guest view. The booking site on a phone. Demo property.

CHAPTERS 02–04
Fact blocks, local pages and answer-first FAQs, written for you on Growth.

CHAPTERS 05 AND 08
Structured data, sitemap, HTTPS and speed handled by the platform.

CHAPTER 09
AI visibility score and search traffic tracked in one place.

READY WHEN YOU ARE

Be the answer.
Take the booking direct.

Your own booking site, local SEO pages and AI visibility tracking, set up for you in a week. No setup fee, cancel anytime.
